- C73 Series
- CB Series
- Combo Series
- Steel Hasp/Staples
- Steel Cable Series
- Boron Alloy Chain

## Key Features for C-Series

## CARBINE **THE NEXT GENERATION IN LOCKING**

*Carbine offers a complete range of padlocks from securing points of access to safeguarding your belongings*

Carbine introduces an unrivalled range of padlocks to secure points of access and safeguard your belongings from intruders and thieves. Carbine's R&D team have designed the Padlock range with several key features which set it apart from the competition.

### FEATURES

- + Rapid Shackle System
- + Reversible Cam
- + Material Options
- + Dual System
- + Reduce Inventory
- + Rigorous Tests
- + Durability
- + Security
- + Corrosion Resistance
- + Domestic and Commercial

### WHY THE CARBINE PADLOCK?

The Carbine Padlock sets itself apart by offering these distinct features:

Why go through the hassle of changing padlocks for a longer shackle?

The Carbine Padlock offers a rapid shackle change by turning the driver. This allows your padlock to be applicable to any given situation.

Reversible cam to change function from a standard snap shut to key retained locking system. This provides the users with the freedom to control the presence of a key. In addition our padlocks are offered with several metal bodies, shackle lengths and shackle protected variants.

Carbine's dual system:

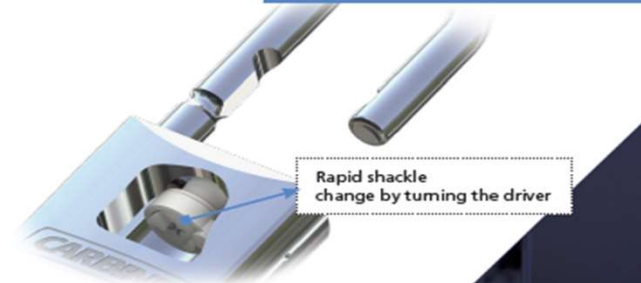

**Rapid Shackle Change & Reversible Cam** allows locksmiths to reduce their inventory substantially by stocking one padlock to suit many applications. Carbine's unique Padlock range and its unique features provide end users with endless possibilities.

CARBINE  
**C-SERIES**  
FEATURES OF  
RANGE

## Rapid Shackle Change System

Carbine's Padlock range features a rapid shackle change system which can be utilised by turning the drive with a screwdriver. Carbine offers a wide variety of shackle lengths for all models which can be ordered separately. This allows installers and dealers to utilise our padlocks in any given circumstance, even in instances where a longer shackle is required for the padlock to close shut.

## Reversible Cam

The Carbine Padlock range is also fitted with a reversible cam, allowing the padlock to change from a standard snap shut to a key retained locking system. A key retained system requires users to lock the padlock before they can remove the key, ensuring the user does not forget to lock up before leaving.

**C45 C50  
Cylinder  
(Fig8)**

**C60 C70 C73  
Cylinder (PD Type)**

## Carbine C Series Cylinder Assembly

### C45-C50 SERIES

Carbine C45 / C50 series accept the Carbine R48 style figure 8 cylinder. All common inline restricted will work in these cylinders using a 570 style barrel. The padlocks will also accept EVVA PA2 style cylinders

### C60-C70 SERIES

Carbine C60 / C70 series accept the Carbine CK001 PD style cylinder. The standard keystone plate (included with padlocks) will work with LKW5 (C4) profile only. All common inline restricted will work in these cylinders using an 8221 style barrel, combined with the additional restricted keystone plates

CXX-KRP-R Steel keystone plate - for Restricted inline  
CXX-KRP-R-SS Stainless steel keystone plate - for Restricted inline

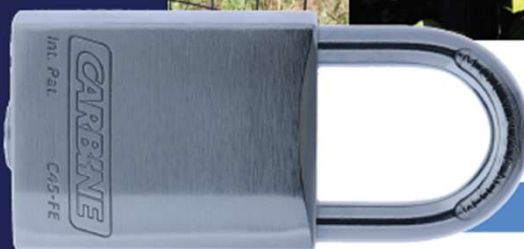

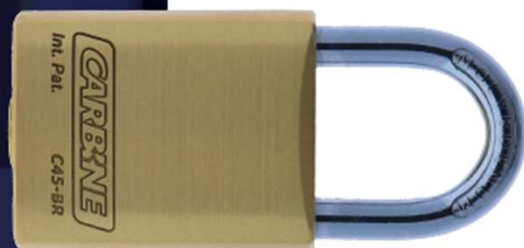

### C73 SERIES

Carbine C73 series accept the Carbine CA001-C73 modified 001 inner style cylinder. All common inline restricted will work in these cylinders using a 001 inner style barrel. The cylinder housings will accept a 6 pin barrel, but can only be keyed on 5 cuts.

CARBINE  
**C45  
SERIES**

RESIDENTIAL | LIGHT COMMERCIAL SECURITY

*Carbine has introduced the C45 Series, which is suitable for general applications and light commercial use. Ideal for securing gates, cabinets, mailboxes, utility rooms and storerooms.*

**C45 SPECS**

- + 45mm bodies
- + Reversible Cam
- + 7.93mm double ball locking
- + Extended shackle models
- + Standard function of snap shut
- + Can be converted to key retained
- + 6 pin R48 cylinder LKW5 (C4)
- + Brass, steel & stainless models

**C45  
WEATHER SHIELD  
PROTECTION**

**Accessories Option**

Available for the C45 series the weather shield will protect the key way from sand, salt water and dust.

## C45 PADLOCK - SHACKLE FEATURES

**Carbine C45**  
Size 30mm  
Diameter 7.98mm

**Brand X**  
Size 30mm  
Diameter 7.98mm

In double ball locking padlocks the locking ball and the inside face of the long shackle leg will interact causing wear, and when sufficient wear has taken place ie wear has moved down the leg, the shackle will pull out of the body. The Carbine padlock series has been designed with a longer leg to provide increased life and greater resistance to loading from any direction.

CARBINE  
**C60  
SERIES**

HIGH COMMERCIAL GRADE SECURITY

*The C60 Series, is a commercial grade security padlock, as it has been innovated for high security while also withstanding highly corrosive environments. The C60 series is ideal for securing equipment, stock, utility rooms and all industrial applications.*

**C60 SPECS**

- + Extended shackle models
- + 11.1 mm rapid change shackle
- + 8.5 mm double ball locking
- + Heavy duty padlock bodies
- + Standard function of snap shut
- + Can be converted to key retained
- + 6 pin PD cylinder LKW5 (C4)

**C60  
WEATHER SHIELD  
PROTECTION**

**Accessories Option**

Available for the C60 series the weather shield will protect the key way from sand, salt water and dust.

***Carbine brass residential padlocks are made for use in general purpose applications. They offer the consumer a varied padlock selection without comprising the quality of the unit itself. They can be used throughout the home and office and in any other application where keying solutions and high security are not of paramount importance.***

- + Solid brass body with a hardened steel shackle
- + Precision brass pin tumbler cylinder
- + Built in bumper around the padlock body to protect surfaces that come into contact with the padlock
- + Available in varying sizes from 20mm through to 50mm
- + They can be ordered in keyed to differ and keyed alike
- + Keyblanks to suit all sizes are also available
